BATUBO VICTORY

Software Engineer

SUMMARY

Creative and detail-oriented frontend engineer with a passion for crafting user-friendly, responsive web interfaces. Experienced in implementing scalable, accessible designs using modern JavaScript frameworks and performance optimization techniques. Deep interest in AI and emerging technologies. Proven success building full-stack applications. Eager to contribute to a global tech company that values innovation and seamless user experiences.

WORK EXPERIENCE

Frontend Developer at 100devs, Remote

March 2025 — Present

- Collaborated with a remote team to build responsive web apps using HTML/CSS, Javascript, and Git
- Built semantically structured frontend interfaces with reusable components
- Used Github for version control and code reviews
- Gained hands-on experience with real client-style and internal projects

Recent Projects:

1. Testiflow – *Testimonial Collection & Showcase App*
A dynamic JavaScript web app that lets users collect, store, and display client testimonials. Features form validation, image support, real-time rendering, and star-based rating display. Built for businesses to showcase social proof.

2. ReviewHub – *Local Review Aggregator UI*
Frontend UI for a review aggregation tool tailored to small businesses. Includes filterable, responsive card layouts, rating displays, and clean presentation using vanilla JavaScript and Tailwind CSS.

3. DashReserve – *Booking & Scheduling Dashboard*
Interactive booking dashboard built with HTML, CSS, and JavaScript. Handles client reservations, time slots, and status tracking. Designed to be extendable for salon owners, consultants, or service providers.

4. VortexCRM – *Lead Capture & Client Relationship Tool*
Simple CRM system to collect, organize, and display client leads. Built with localStorage and modular JS structure. Includes lead form, status tagging, and dynamic search/filter features.

Frontend Web Developer at Phoenix Domain | Portharcourt, Nigeria

June 2025 — Present

Created responsive frontend web applications and static websites for small to medium-sized business clients, focusing on clean design, performance, and user experience. Also provided strategic consulting on **SEO best practices and social media presence** to help clients grow their digital footprint.

Clients included G&3J Designs, LightUp Uniport and many more.

Freelancing

March 2025 — Present

G&3J Designs
Developed a clean, responsive website showcasing the client's graphic design portfolio and services. Focused on intuitive navigation, fast load times, and mobile-first design to attract and engage potential customers.
